

ISW specializes in Integration Solutions

Our Process

Discovery Phase

Our solution consultants work to understand your concerns and determine the root of the problem.

2. Consultation Phase

We determine and propose the solution that will make the biggest difference, work within your budget, and be the easiest to us.

3. Engagement Phase

Once you've decided to move forward, our engineers will scope the project and get to work, meeting deadlines and completing projects as scoped and on time (often early).

4. Client Care Phase

Caring for you and your business is our specialty, meaning we'll be there to answer your questions and troubleshoot any issues as our client care specialists are waiting, responsive, and thorough.

Cookie-cutter to Customized

Our specialty is solving your business process problems. Initium Softworks (ISW) can link one business application to another with the use of out-of-the-box integrations or we can create a targeted solution based on your specific needs.

The Problem

Several key platforms, from older legacy systems to newer cloud-based and on-premise applications, help businesses function—each created for a particular use. Housing data and content specific to that use, they create new problems, including:

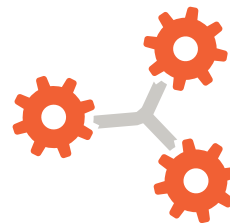

- ⚠ Slower work
- ⚠ More errors due to switching and manually moving data
- ⚠ Incomplete or manual reports due to having data spread out
- ⚠ Difficulty evaluating processes
- ⚠ Complicated troubleshooting and training processes
- ⚠ An incomplete view of customer transactions

Manually switching between platforms is time-consuming and creates inaccuracies. These are costing your organization. The right integration solution will eliminate these issues.

The Solution

Initium SoftWork's consultants can define the perfect solution to integrate all of your business platforms. Our team has successfully implemented these solutions for many businesses.

Pulling documents from multiple locations, storing them in a central location, and serving them to users in a single place

Integrating purchasing data with accounts payable data, creating 3-way matching

Reconciling across applications

Our team knows how painful multi-platform integration can be and have extensive experience evaluating and solving these challenges with affordable, scalable solutions that can be self-managed after implementation. Reach out today!

OUT-OF-THE-BOX

Software Integration Solutions

We're always developing new integrations and have the capability to do custom development where needed. Many of these already exist and can be easily implemented. Our partners are the best at what they do and provide hundreds of out-of-the-box integrations.

Is there an out-of-the-box solution for you or will custom be better?

- Do you have limited or high-level in-house expertise?
- Are you looking for integration with legacy systems?
- Are you investing in solutions for long-term cost savings?
- Do you have unique business requirements?
- What are your scalability requirements?

Reach out today! Schedule your **FREE** consultation.

*We'll quickly determine if we can help and will dive right into discovery, proposing a **solution without wasting any of your valuable time.***

Don't See Your System? We can Customize Your Integration.

This is a list of common integrations, not a complete list of our capabilities. If you don't see the system you use, contact us directly, and we'll answer your questions.
